

## Boring portable machine FA 40

**Machining range :**  $\varnothing$ 45 to 200 mm (400 option)

**Speed:** 0 to 200 tr/min

**Weight Bar :** 20 Kg

**Ahead of the bar :** Mecanic system 0 to 0,2 mm/tr

### Technical characteristics :

**Standard Motorization:** Electrical motorization 220 V (brushless motorisation in option)

**Bar diameter :**  $\varnothing$  40 lg 2 meters \_ Kit bar  $\varnothing$  25 mm (Bar lg 1,20 mèter)\_Option

**Weight :** 45 Kg

**Tools :** Carbide insert.

### Welding equipment :

**Welding :** MIG

**Capacity welding :**  $\varnothing$  45 to 200 (option 400)

**Weight for welding system :** 21 Kg.

**Bar diameter :**  $\varnothing$  30

**Bar lg :** 1,4 m

**Wire diameter :**  $\varnothing$  0,8

**Ahead of the bar :** Mecanic system 0 to 4 mm/tr

This process is automatic without electronic . it uses only one motor , for rotation. The mechanical adjustment of the feed allows 0 defects welding

**The machining and welding parts can be sold separately. The machine is supplied ready to use , with centering equipment, screws, torches,inserts, tool holders etc ...**
