

Boring portable machine FA 60

Machining range \varnothing 70 to 400 mm (600 option)
Speed : de 0 to 45 tr/min
Weight Bar 44 Kg
Ahead of the bar : Mecanic system 0 to 0,2 mm/tr

Technical characteristics :

Standard Motorization: Electrical motorization
220 V (brushless motorisation in option)
Bar diameter : \varnothing 60 lg 2 mètres _
Weight : 90 Kg
Tools : Carbide insert.

Welding equipment :

Welding : MIG
Capacity welding : \varnothing 65 to 400 (option 600)
Weight for welding system : 30 Kg.
Bar diameter : \varnothing 30
Bar lg : 1,4 m
Wire diameter : \varnothing 0,8
Ahead of the bar : Mecanic system 0 to 4 mm/tr

This process is automatic without electronic . it uses only one motor , for rotation. The mechanical adjustment of the feed allows 0 defects welding

The machining and welding parts can be sold separately. The machine is supplied ready to use , with centering equipment, screws, torches, inserts, tool holders etc ...
